Exceptional

A few years ago I used to believe only in traditional Western Medicine. She is a preferred provider for BCBS. Dr. Cecilia has opened my mind up to endless treatment of acupuncture. Like anyone else, I was a little hesitant a few months ago. As soon as I met her I was reassured by her professional and caring bedside manner. She did a thorough workup of my chronic conditions before we got to the acupuncture stage where she was completely reassuring and asked for my feedback every step of the way. She has me on herbal medications which she formulates for my condition. As a result of my treatment I have been able to significantly reduce my GERD medication and anti-anxiety medication. My overall chronic back pain has been greatly reduced and fatigue level impressively reduce. I would not hesitate to recommend Dr. Cecelia to anyone. [Less](#)

### Best Care and Treatment

Posted by [cmendozamc12](#) on 01/05/2009

Exceptional

Excellent care and treatment. Dr. Gulyas explains treatment plan and what to expect. The services received were above exceptional and I highly recommend acupuncture treatment with Dr. Gulyas.

### **PAIN FREE**

Posted by **Victoria28** on 12/04/2009

Exceptional

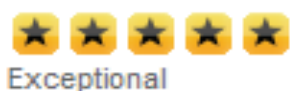

After a hip injury sustained in an auto accident almost 5 years ago, I am finally able to live without pain and do all the activities I had previously enjoyed. I had seen a chiropractor, several specialists, had steroid injections, physical therapy, and a pile of prescriptions. I had temporary relief at best. One day during a very painful episode, I wandered in the Acucare office. Dr. Cecilia was warm and welcoming. I had three acupuncture sessions and was given Chinese herbs to take three times a day. After the third session the Dr. told me I didn't need anymore. She was right. A year has past and I have had no more pain in my hip. Dr. Cecilia is very knowledgeable, thorough and compassionate. I found other health and mood improving benefits resulting from the treatments. I have recommended Acucare to many others. [Less](#)

### **caring and accurate**

Posted by **jltxyz** on 09/05/2008

Exceptional

I found the Acucare Solutions doctor very knowledgable about my condition which had existed for about three years without relief from my GP. Her diagnosis was correct and she treated me with herbs. Although I was skeptical I found my condition improving and best of all my severe depression left me in about a week. This was a miracle. Not only was the pain gone, but the great swelling in my feet and hands left me completely and my energy level improved so much that I am active all day now instead of taking a rest every hour or so. I have been seeing her for about six weeks and plan on continuing as I am so encouraged that even if nothing is wrong with me I want to get my whole system completely toned up. I recommend her highly. [Less](#)

### **I have received exceptional ca...**

Posted by **alongs** on 06/17/2008

Exceptional

I have received exceptional care. The Acupuncture treatments have worked to improve my overall health and the Traditional Chinese Medicine have helped to improve my quality of life.
